

LONGHI

ALMA

W 850 Margherita Fanti

The structure of the bed is made of wood covered with medium-density polyurethane foam. The headboard is available in two versions: without equipment, or equipped with two sculpted columns connected by wooden shelves with a front panel in anodized aluminum. The back of the headboard is finished in the hidden "wall" section with the "LONGHI" branded fabric. Upon request, the entire back part of the headboard can be finished in the same material as the front upholstery. The bed frame is made of wood covered with medium-density polyurethane foam, and can accommodate:- A fixed slatted bed base with adjustable height wooden slats.- An inset spring mattress box flush with the base.-A practical storage compartment characterized by two movements to bring the mattress flat. The bottom of the storage compartment is made of laminated wood with a satin effect. Due to the particular craftsmanship, the leather and fabric upholstery is NOT removable.
