

EDGAR

W 593 Giuseppe Viganò

A collection characterized by a padded structure with external armrests in tubular metal with a wrap-around form, partially covered in a strip of "Renova", a particular type of sustainable anti-bacterial recycled leather that will match or contrast with the colour of the main sofa upholstery. A metal belt perfectly covered in this new material is placed in the base. The sofa is supported by robust metal feet that are also covered in "Renova", which looks like natural full grain leather. The rest of the structure is in wood, covered in high density polyurethane foam. The seat cushions are in triple density polyurethane foam, with a soft quilted cover in certified sterilised goose down. The backrest cushions are in certified sterilised goose down. The visible tubular metal parts have the following chrome finishes: Shaded copper, Bright shaded brown, Black Rose gold, bright light gold, Champagne gold, bright chrome, bright black chrome, matt satined bronze. The modular elements are assembled together with a quick connect foot in tubular metal, painted bronze and partially covered in "Renova". Utility shelves in wood or marble from the catalogue complete these compositions. An elegant tray covered in leather or "Renova" can be requested. Given the special manufacturing process, the structure upholstery is NOT removable, but the seat cushion upholstery can be removed.
