

MEGAN

X 695 Giuseppe Viganò

Armchair with a padded structure with external armrests in tubular metal with a wrap-around form, partially covered in a strip of "Renova", a particular type of sustainable anti-bacterial recycled leather that will match or contrast with the colour of the main armchair upholstery. A metal belt perfectly covered in this new material, which looks like natural full grain leather, is placed in the base. The armchair is supported by a robust metal frame. The upholstered structure is in wood, covered in high density polyurethane foam. The seat cushion is in triple density polyurethane foam, with a soft quilted cover in certified sterilised goose down. The backrest cushion is in certified sterilised goose down. The visible tubular metal parts have the following chrome finishes: Shaded copper, Bright shaded brown, Black Rose gold, bright light gold, Champagne gold, bright chrome, bright black chrome, matt satined bronze. Given the special manufacturing process, the structure upholstery is NOT removable, but the seat cushion upholstery is removable.
