

NAPOLEON BED

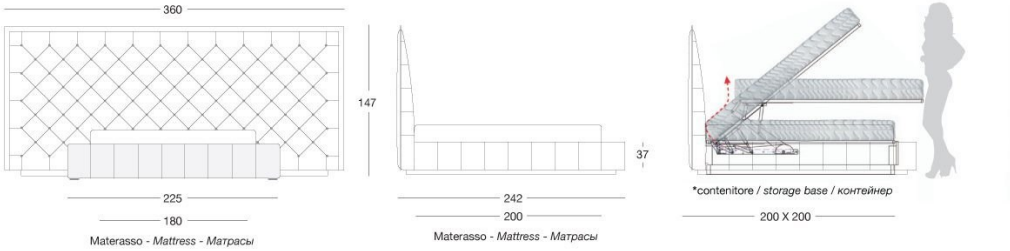

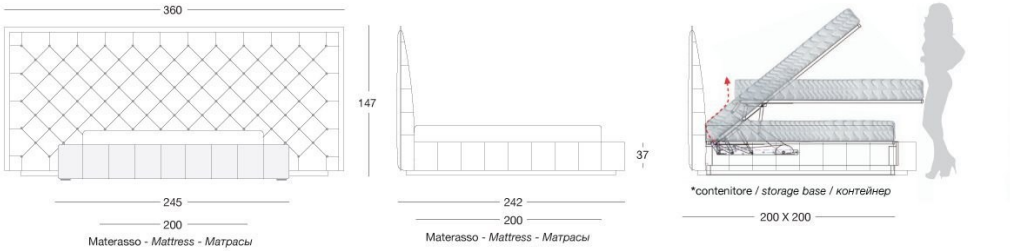

W 810 Giuseppe Viganò

Frame in beech plywood, covered in multi-thickness polyurethane foam. The perimeter border is finished by hand, to match the upholstery or in different materials available in the sample selection. The backrest has a "Capitonné" pattern, with buttons in plain colour or with Swarovski crystals. The platform base, divided from the headboard, is assembled with metal corner pieces that also allow easy mounting and adjustment of bedspring height, to lower it 10 cm under the bed edge 2 cm at a time. This allows any type of bed spring to be used, and also permits the height of the mattress level to be changed. The base can accommodate: the fixed mattress base structure with height-adjustable wood slats. Sommier spring base for bed bases fitting flush with base, a convenient storage container that opens with two movements to maintain the mattress in a flat position. The bottom of the container is in laminated wood with a silky surface finish. A pair of wireless remote controlled electrified mattress bases, with motors integrated directly into the structure, which balance the amortised wood slat structure. Dedicated mattresses must be used with this type of bed base. Given the special manufacturing process of the headboard, fabric or leather upholstery is not removable. It is possible to have only the back of the backrest covered in velvet, without quilting, coordinated with the colour of the leather.
