

AMY

W 843 Giuseppe Iasparra

A bed characterised by a modular headboard, which can be adjusted to multiple positions both in height and in width. The structure is in wood, covered in polyurethane foam joined with nylon mesh. The panels are in medium-density polyurethane foam, upholstered and applied individually to the load-bearing structure (for ease of transport, in larger sizes it is divided into two parts). Attachment to the base takes place by means of practical bayonet joints. On the back of the headboard, provision is made for simple (and advisable) attachment to the wall, which allows the utmost stability and safety of use. The back of the headboard is available with leather or matching fabric upholstery, or covered with a matching canvas signed by Longhi. On request, in the upper part of the headboard, charming and soft dimmer-switched LED lighting can be applied. Two elegant chrome-plated aluminium inserts complete the sides of the headboard in the catalogue finishes. The base can accommodate: the fixed mattress base structure with height-adjustable wood slats. Sommier spring base for bed bases fitting flush with base, a convenient storage container that opens with two movements to maintain the mattress in a flat position. The bottom of the container is in laminated wood with a silky surface finish. A pair of wireless remote controlled electrified mattress bases, with motors integrated directly into the structure, which balance the amortised wood slat structure. Dedicated mattresses must be used with this type of bed base. The bed frame contains a metal ring, chrome-plated in the finishes: Satin nickel, bright shaded brown, bright light gold, matt Champagne gold, Black Rose gold, bright chrome, bright black chrome, matt satin bronze, bright pink gold, matt pink gold.
