

ENDLESS BOISERIE

Serie 340 Alessandro La Spada

The Boiserie Endless system has many modular features that make it possible to furnish rooms with elegant finishes and to outfit the walls of walk-in wardrobes. Panel finishes are in: white or wengé melamine facing, white larch, thermo oak, or herringbone melamine facing, white open pore lacquer or coloured paints from the catalogue (on request, RAL colours), leathers from the catalogue, natural, bronze or smoky mirror, decorated mirror in the colours bronze or smoky, single-coloured tempered glass in the colours in the range, tempered glass with decoration painted in the colours in the range.

End profiles are in aluminium: matt platinum, bright shaded brown, bright light gold, bright glossy champagne gold, matt satin bronze, bright aluminium, glossy white, bright dark brown electrocolour, matt black electrocolour, natural anodised, matt dark brown electrocolour.

Endless Boiserie adapts to rooms in many ways, and comes in two aesthetic types: with entire panels or with 90 cm modules.

Positioned as a wall covering, it can be matched with all types of Longhi brand doors and the modular system Ianus Middle. If it is placed on the back of walk-in wardrobes, it completes the installation and renders it more sophisticated and prestigious. Width measurements vary based on the available space, and proportions and alignments are always maintained. The leather boiserie panel can be double sided, depending on where it is installed: entire panel (A) with leather panels sewn together for walk-in wardrobes (see the Doors Aluminium Chic Collection), or modules (B), standard measurements 45/90xH90 cm, with bevelling for all other types of installations.
