

BOUTIQUE

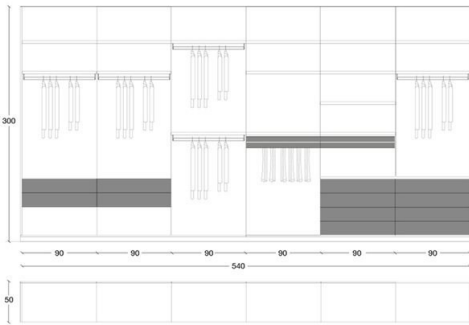

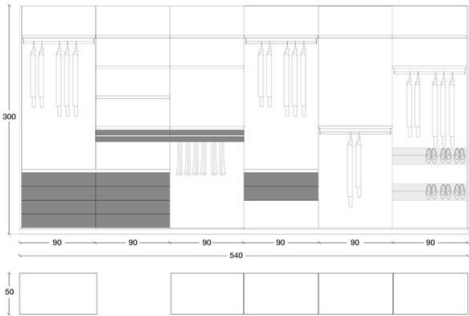

Y 520 Elle Studio

With BOUTIQUE, the walk-in closet becomes a living space — elegant and functional. The solid structure is made of aluminum, available in two matte finishes: Champagne and Moka. The system consists of a sturdy base supporting modular panels available in three depths: 90/60/45 cm, and three heights: 295/268/241 cm. The panels are available in “Elm”, “Canaletto Walnut” or “Eucalyptus” melamine, or in glossy/matte wood veneer: Sicomoro Frisé, Eucalyptus, Dark Canaletto Walnut, and Medium Canaletto Walnut. The panels can also be upholstered in P.3 Tecsuede or “FILE” fabric in the colors shown in the sample collection. Alternatively, they can be lacquered in glossy or matte finishes in the sample colors. The panels are alternated with vertical rails to which, using brackets, the accessory elements are attached, allowing complete customization of the composition: shelves with optional lighting, 2- and 4-drawer units, shoe racks, modules with trouser racks and pull-out trays, hanging rails, hangers, and clothes lift rods. The composition includes an aluminum frame profile outlining the panels, with optional lighting. The horizontal profile running along the entire composition is also available as an option.
